

TC31-5

S.M.D. TEMPERATURE COMPENSATED CRYSTAL OSCILLATOR (TCXO)

The TC31-5 series provides a range of compact temperature compensated crystal oscillators operating at +5.0V supply with either HCMOS or clipped sinewave outputs. The optional voltage control feature and small size makes this range of TCXO's an ideal choice for existing and future applications where reliability, cost and performance are critical factors.

ADVANTAGES

- † Surface Mount
- † Small size
- † Optional Output and Adjust Method.
- † Wide Operating Frequency Range

APPLICATIONS

- † Telecommunications
- † Portable Instrumentation
- † Mobile Communications.
- † Global Positioning Systems (GPS)
